

**Features** in the July Release will be activated July 20th. It includes:

1. Transfer Report (your data load will populate the fields for this report, so it will not be completely useful until after all divisions have submitted their full data file to EIMS)
2. Wave 2 (final) of the EIMS Disaggregator Reports
3. Update File Management (no more issues with Responsible and Serving school)
4. A few enhancements to reports and navigation bar
5. Updates to Administration, File Management and Reporting Procedures Guides

**Notice:** EIMS will not be available July 30 and 31st (Saturday and Sunday)

**Pre-Submission Enhancement:** All divisions can use the PreSub application with a 9 in the A record to only error check the 20 EIMS fields, so you can run this and not get errors showing up on blank STI fields.

**Full Data Load to EIMS:** You can begin your full data load to EIMS using the EOY data layout beginning July 20. The deadline to complete the load and resolution is August 9th.

**Birds-of-a-Feather:** We are planning a Richmond area Birds-of-a-Feather session sometime in the first week of August. It will feature training of Reports with emphasis on the **EIMS Disaggregator Tool on Preliminary SOL data**. There will be a morning session and an afternoon session. Pre-registration will be required and you can choose if you want to attend the morning or afternoon session. The number of participant will be limited and **DDOTs will get preference**. Other regionalize training opportunities will be available in the future. More later.
